More Details Toolbar Option

By double-clicking anywhere on the **Responsive Model Canvas,** it is possible invoke the the 'More details' pop-up box. 'More details' allows the End User to discretely record more information directly on to the canvas:

'More details' appear on the canvas as an   icon. This icon can be dragged around the
Responsive Model Canvas to be placed in a more convenient location. Equally, an unlimited
number of 'More details' can be added.

More details   ✕

Should a 'More details' be required to be deleted, simply click on the   icon, and then press
the trash can button.
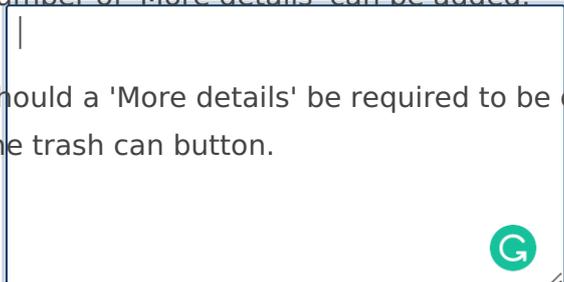

> The ability to use the 'More details' feature is dependant on whether the End User has the correct roles - in this case, the Edit and Admin roles - for the project. Also, the 'More details' feature can be toggled off - via the COSMOS Toolbar.

Revision #6
